The team also imparted training to the staff members at the various Rice Mills and addressed the questions, issues and queries by them on the usage and viability of our "eGalla-ERP" as an ERP package.

During discussion the team came across a few valid issues which were recorded. After this the team completed the "ERP Deployment Acknowledgement Form" and handed over "ERP-Evaluation document" for their post usage feedback. A telephonic and email support to the Rice Mills is being provided as per requirement.
